Description 28MM BLCK COMM DEE

SHACKLE 26/05/15

Next Inspection Due
Load Applied To Destruction 29.33 Tonne

Test Result:

Date of Inspection

Inspection Comments: Conducted by: Logan Squire

Signatory:

Darryn Scrivener

IED Lifting Centre Ltd's code of practice requires that a rigorous visual inspection is carried out prior to proof loading, and that all equipment is tested according to relevant National or International safety standards. Where no such standard exists, the manufacturer's requirements are followed. If the testing requirements of a standard are different to those required by the New Zealand Rigging Code of Practice, then the requirements of the code are used.
